COVID-19
Roadmap to Recovery
DASHBOARD

TEXAS
Realth and Human Texas Department of State

4/26/2020, 3PM

#### **TEXAS**

#### Notes:

- [1] Symptoms data listed for 'TODAY' is from the previous day, but it is most current available.
- [2] DSHS updated the method of reporting COVID-19 cases in Texas to provide the public with more timely information. Total cases reported publicly by local health departments around the state. That change led to the report of an additional 305 cases in the March 24 total.
- [3] Application of CDC testing prioritization criteria now includes asymptomatic persons.

#### Data Sources:

\*Testing, cases, fatalities, lab confirmed COVID-19 hospitalizations, and estimated recovered patients displayed here were posted to the DSHS COVID-19 public dashboard.

- Tests include those performed by public labs (Laboratory Response Network) and private labs (commercial labs, hospitals, physician offices, and drive-thru sites) reported electronically and non-electronically to DSHS.
- Symptoms are captured using CDC-designed queries applied to Texas hospital ERs, standalone ERs, and urgent care facilities as part of Texas Syndromic Surveillance (TxS2) for county of residence.
- Cases and fatalities are reported for county of residence by local and regional health departments. Demographics are from completed investigations by local and regional health departments received by DSHS.
- Lab confirmed COVID-19 patients are reported from Texas hospitals to DSHS for Trauma Service Areas A-V.

†Estimated recovered patients, as reported on DSHS COVID-19 Public Dashboard, is computed using the following steps:

- 1. Include total confirmed cases (as posted to DSHS COVID-19 Public Dashboard: https://txdshs.maps.arcgis.com/apps/opsdashboard/index.html#/ed483ecd702b4298ab01e8b9cafc8b83)
- 2. Remove any deaths
- 3. Estimate that ~20% of remaining/living cases required hospitalization and ~80% of remaining/living cases did not
- 4. Estimate that recovery time for hospitalized patients is ~32 days, and recovery time for non-hospitalized patients is ~14 days (https://www.who.int/docs/default source/coronaviruse/who-china-joint-mission-on-covid-19-final-report.pdf)

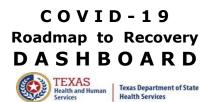

Include data starting from: 3/24/2020

4/26/2020, 3PM

Notes: †Recovered reported publicly by local health departments (retrieved 4/19 onwards).

For all other Counties, an estimate of patients recovered is computed using the following steps:
1. Include total confirmed cases (as posted to DSHS COVID-19 Public Dashboard: https://txdshs.maps.arcgis.com/apps/opsdashboard/index.html#/ed483ecd702b4298ab01e8b9cafc8b83) Remove any deaths

3. Estimate that ~20% of remaining/living cases required hospitalization and ~80% of remaining/living cases did not
4. Estimate that recovery time for hospitalized patients is ~32 days, and recovery time for non-hospitalized patients is ~14 days
(https://www.who.int/docs/default source/coronaviruse/who-china-joint-mission-on-covid-19-final-report.pdf)
Include data starting from: 3/24/2020

\*TOTAL Estimated Patients Recovered (estimated for all Counties) reported on DSHS COVID-19 Public Dashboard 4/8 onwards. Due to the above estimation method, there are additional discrepancies between the summation of estimated county counts and the estimated statewide totals due to rounding.

\*\*TOTAL Estimated Patients Recovered (includes publicly reported numbers by LHDs available previous day).
